

The Optics Institute
Of Southern California

presents **The Speed of Light**

An Exhibit at
Irvine City Hall October 2004
John Wayne Airport Summer 2005

Celebrating over 70 years of High Technology Research
And Innovation in Optics and related Sciences.

The Michelson Speed of Light Experiment at the Irvine Ranch

$C = 299,792.4562$ kilometers per second, plus or minus 1.1 meters per second

The exhibit will include:

- A scale model of the former experiment site on an 8' x 4' table (under glass)
- A working modern version of the experiment – you can take data too!
- Several display panels to mount graphics and explanatory text nearby
- Information on other related science and technology developed through the years.
- The exhibits will be open to the public during normal business hours.

Sponsorships are available.
